Building & Automating Scalable, Secure and Reliable Infrastructure

PROFESSIONAL SUMMARY

Results-driven DevOps and Site Reliability Engineer (SRE) with an automation-first mindset. Specializing in building, securing, and optimizing high-scale distributed systems across AWS. Adept at advanced Linux administration, Infrastructure as Code (IaC), and engineering high-speed CI/CD pipelines. A proactive problem-solver committed to conducting deep-dive root cause analyses, maintaining strict compliance standards, and collaborating with cross-functional teams to drive continuous operational excellence.

TECHNICAL SKILLS

Operating Systems	: Linux (Ubuntu, CentOS, RHEL), Unix
Scripting Languages	: Python, Bash Scripting
Cloud Environments	: AWS (EC2, EKS, VPC, S3, ECR, CloudWatch, RDS, DynamoDB), Azure
Infrastructure as Code	: Terraform, Ansible
Containers & Orchestration	: Docker, Kubernetes, EKS, Helm
CI/CD, GitOps & Security	: Git, GitHub, GitLab CI, Jenkins, GitHub Actions, ArgoCD, DevSecOps, Trivy, SonarQube, OWASP ZAP
Monitoring & Observability	: Prometheus, Grafana, Datadog, ELK Stack, Loki, OpenTelemetry, cAdvisor
Databases	: PostgreSQL, MySQL, Redis
Networking	: TCP/IP, HTTP
Methodologies & Tools	: Agile Methodologies, SDLC, Jira, Confluence, Power BI, Slack, Chatops, Capacity Planning, Process Automation

KEY PROJECTS

- **Production-Ready AWS Infrastructure Automation | Terraform, AWS (EC2, VPC, S3, Security Groups), Apache, GitHub, Trivy**
Architected a modular AWS infrastructure using Terraform. Deployed a custom EC2 module, VPC with public/private subnets, and an S3 bucket for remote state locking. Automated Apache web server provisioning via EC2 User Data. Enforced IaC security by implementing Security Groups, dynamic variables, and Trivy security scanning to remediate misconfigurations.
- **DevSecOps End-to-End CI/CD Pipeline | GitHub Actions, Docker, SonarQube, Trivy, OWASP ZAP, DevSecOps**
Designed a secure end-to-end DevSecOps CI/CD pipeline using GitHub Actions to automate code quality analysis, security scanning, testing, containerization, and deployment. Integrated SonarQube, Trivy, and OWASP ZAP for DAST/SAST. Automated Docker image build/push while enforcing security gates.
- **Infrastructure Automation & Cloud Provisioning | Python, Terraform, AWS EC2, IaC**
Implemented infrastructure automation utilizing Python and Terraform for AWS EC2 provisioning. Developed Python scripts (subprocess module) to automate Terraform commands (init/apply) for repeatable IaC deployments, automating provider initialization and complete EC2 lifecycle management.
- **Production-Ready EKS GitOps Platform & Observability | AWS EKS, GitHub Actions, Argo CD, Docker, Prometheus, Grafana, cAdvisor**
Engineered a comprehensive GitOps CI/CD workflow establishing Git as the single source of truth. Automated Docker image builds, testing, and dynamic version bumping via GitHub Actions. Implemented continuous delivery on Amazon EKS using Argo CD for automated manifest synchronization, drift detection, and self-healing. Integrated an end-to-end observability stack utilizing cAdvisor, Prometheus, and Grafana for real-time infrastructure and container monitoring.

PROFESSIONAL EXPERIENCE

Tech Mahindra (British Telecom), UK | Network & Infrastructure Engineer | Jan 2025 - April 2026

- Supported large-scale modernization initiatives, collaborating with cross-functional development teams to manage cloud-hosted Media Gateway (MGW) infrastructure and provision robust AWS resources, driving a 35% increase in efficiency.
- Ensured continuous reliability and performance of cloud-hosted environments via rigorous Linux system administration and cross-timezone collaboration, maintaining zero critical downtime over 15 months.
- Implemented automation scripts to evaluate infrastructure across 1000+ sites, providing data-driven recommendations that effectively reduced hardware operational costs by 20% while streamlining workflows.

Allied Worldwide Limited, UK | Human Centric Digital Innovation Lead | Sep 2024 - Dec 2024

- Led technical support initiatives related to infrastructure systems, embedding Agile methodologies and automation to accelerate overall deployment processes by 25%.
- Demonstrated personal effectiveness and problem-solving abilities by leveraging Python and Bash scripting to automate 40+ routine data tasks, driving technical innovation.

Allied Worldwide Limited, UK | Data Analyst & Research Associate | Aug 2023 - Sep 2024

- Assisted in maintaining comprehensive infrastructure documentation and ITSM tracking for over 50+ critical enterprise systems, ensuring 100% compliance to support business continuity.
- Supported 5+ cross-functional teams, utilizing excellent communication and storytelling to translate technical data, successfully reducing stakeholder miscommunications by 30%.

EDUCATION & CERTIFICATIONS

- **Bachelors of Business Administration** | Guru Gobind Singh Indraprastha Univ, Delhi (Sep 2019 - Sep 2022)
- **MSc Supply Chain & Logistics Mgmt** | University of Strathclyde, UK (Jan 2023 - Mar 2024)
- **Certifications:** DevOps with Security - TrainWithShubham, AWS Certified Cloud Practitioner - TrainWithShubham (2026), HashiCorp Terraform Associate (In Progress), Certified Kubernetes Administrator - CKA (In Progress)
